

Summer of 2017 Oil & Chip Operations

The Belleville Street Department will conduct oil & chip operations from August 28 – September 1, utilizing IDOT approved oil and chips.

Motorists are asked to observe traffic control signs and flag personnel. Cars should be removed from the streets by 7:00 am. Signs are generally posted prior to oiling & chipping, however, the exact day for a particular street cannot be determined. Oil curing time is dependent upon air temperature and humidity, but usually takes 45 minutes to 1 hour. After oil is applied, chips are spread. Motorists are asked not to drive over fresh oil and to exercise caution on the freshly chipped streets.

The streets that are currently scheduled for Oil & Chip operations are bordered by:

- West Boulevard on the east,
- Rosehaven Drive on the north,
- E. Main Street/Carlyle Avenue on the south, and
- Rt. 159 (N. Illinois Street) on the west.
