

2018 OIL & CHIP OPERATIONS SCHEDULE

The Belleville Street Department will conduct oil & chip operations August 20 - 24, 2018, weather permitting. IDOT approved oil and rock chips will be used. Area streets scheduled for oil & chip are in the southeast part of Belleville. The area is bordered by State Rte 159 to the west and State Rte 161 to the north.

Motorists are asked to observe traffic control signs and flag personnel and to move parked cars off the streets by 6:00 am. Signs are generally posted on streets prior to operations, however, the exact day for a particular street oiling cannot be determined.

Oil curing time is dependent on air temperature and humidity, but usually is less than 15 minutes. After the oil is applied, chips are spread, and a roller compacts the chips into the oil.

Motorists are asked to please not drive over fresh oil and to exercise caution on the freshly chipped streets. The City of Belleville is not responsible for vehicles driving through fresh oil before chips have been spread or for weather related issues.
